

Medicaid Work Requirements: Georgia

Operational briefing for state Medicaid leadership

Georgia has not adopted ACA Medicaid expansion.

The OBBBA work requirement applies specifically to the Medicaid expansion-adult eligibility group (Category VIII, ages 19–64, ≤138% FPL), which does not exist here. The working-age uninsured population that would be subject if your state expanded is shown separately. The verification-system build is moot in your current policy posture.

This brief covers the working-age uninsured baseline and peer-state comparisons that may inform future expansion-policy decisions.
